

JITENDRA MISTRY

Senior Flutter Engineer · Fintech, Travel & IoT Mobile Specialist · Android, iOS & Web
jitendramistry76@gmail.com · +91 7046430704 · Gandhinagar, India · [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Senior Flutter Engineer with 6+ years building and shipping production-grade cross-platform applications across fintech, IoT, travel, e-commerce, and healthcare — end-to-end from architecture through CI/CD and App Store / Play Store deployment on Android, iOS, and Web. Led engineering teams in Agile environments, designed reusable clean-architecture frameworks adopted company-wide, and used AI-assisted tooling (GitHub Copilot, Claude, ChatGPT) to accelerate delivery, code quality, and documentation.

TECHNICAL SKILLS

Languages	Flutter, Dart, .NET (C#)
Architecture	Clean Architecture, MVVM, GetX, Bloc, Provider, Dependency Injection, Modular Architecture
Testing	Unit · Widget · Integration Testing, flutter_test, Mockito, TDD
Mobile	REST APIs, WebSockets, BLE, Push Notifications, Background Services, Google Maps, Platform Channels, Biometric Auth, Encrypted Storage, APK Optimisation
Payments	Razorpay, Stripe, Google Pay, PhonePe, Paystack, In-App Purchase
Cloud /DB/Analytics	Firebase (Auth, Firestore, FCM, Crashlytics, Analytics), AWS IoT, PostgreSQL, Mixpanel
DevOps	Git, GitLab, Bitbucket, Azure DevOps, Codemagic, Fastlane, Android Studio, Xcode, VS Code
AI Tools	GitHub Copilot, Claude, ChatGPT — code generation, architecture, debugging, test writing, documentation
Leadership	Agile, Scrum, Team Lead, Sprint Planning, Code Review, Mentoring, Client Communication

PROFESSIONAL EXPERIENCE

Senior Flutter Engineer · OneClick IT Consultancy · Ahmedabad *Sept 2021 – Present*

- Owned end-to-end delivery across fintech, healthcare, IoT, and travel product lines — requirement gathering, sprint planning, architecture, client communication, and store releases — in Agile/Scrum teams.
- Led the mobile team through code reviews, pair programming, and architecture walkthroughs; onboarded engineers within their first sprint and established review standards that cut production defects significantly.
- Built a reusable component library and plug-and-play clean architecture template adopted across all projects, reducing new-project bootstrap from weeks to days; leveraged AI tools for scaffolding, generation, and documentation.

Fintech — SIP Mutual Fund Platform *[Android & iOS]*

- Architected a goal-based SIP investment platform covering fund discovery, portfolio tracking, returns visualisation, and KYC onboarding; secured with biometric auth, certificate pinning, and AES-encrypted local storage; unit and widget tests for all critical financial flows.

IoT & Healthcare — Connected Pill Reminder *[Android & iOS · 1K+ downloads]*

- AWS IoT-connected app with BLE device pairing, medication scheduling, and adherence tracking; optimised device discovery and UI rendering on low-end devices; integration tests covering pairing, scheduling, and background sync.

Auto & Vehicles — GPS Driver Coaching App *[Android & iOS · 8K+ downloads each]*

- Real-time GPS tracking, speed/braking analysis, and driver scoring using MVVM; reduced APK size from 70MB to 30MB and startup time from 3 s to under 800 ms; built full-stack with .NET APIs and PostgreSQL.

Travel — Bus Booking & Ticketing App *[Android & iOS · 5K+ downloads]*

- Full-featured booking platform (search, seat selection, payments) with API-driven modular architecture; lazy-loading cut cold-start time by 30%; unit-tested core booking and availability logic.

Flutter Developer · Primocys *Apr 2020 – Sept 2021*

- Built e-commerce and messaging apps with Flutter, Firebase, and REST APIs; created shared widget libraries that improved UI consistency; reduced crash rate from 4.2% to 0.6% via Crashlytics-driven fixes; delivered a Flutter Web companion for the chat platform.

Android Developer Intern · Primocys *Oct 2019 – Mar 2020*

- Android feature development, UI implementation, bug-fixing, and release preparation in a live production environment.

EDUCATION

Bachelor of Engineering in Information Technology · Sigma Group of Institutes, Vadodara · 2015 – 2019 · CGPA: 8.3 / 10
